

Good afternoon,

As we are now only a few weeks away from the start of Targa Hawkes Bay, there are a few things that you need to be aware of.

In particular, the updated fuel calculations especially for those who have high fuel consumption vehicles.

These have been updated on the website for your information which are available to [view here](#).

The Roadside Refuels at the end of Stage 12 & Stage 13 on Leg 2 **are remote and there is no access for Service Crews** to these locations.

We have arranged Targa Officials to transport your fuel and manage these areas on the day. The driver and co-driver will be required to refuel their own vehicles.

Please check the Itinerary to work out if you need to use these Remote Refuel areas.

If you require these Remote Refuels **you must:**

- [Complete the online registration form](#) no later than **Monday 13th May**.
- Ensure your fuel is delivered to our designated Targa Official at the Start of Leg 2 in Rotorua and indicate which refuel area you would like to use.
- The maximum fuel per vehicle will be 1 x 20L approved fuel container per refuel location (maximum of 2 per vehicle if using both refuels) and must be labelled with your competition number.
- Obey the Code of Practice for Motorsport Fuel ([available here](#))

If you're unsure or have any other questions, please let me know as soon as possible.

Furthermore, please don't forget to complete your Functions Form if you're yet to do so! We need these in no later than Friday, 3rd May. These are also [available on our website](#).

Kind Regards

Raewyn Anderson
